Journal of Engineering Mathematics **38:** 473–474, 2000.

Contents of Volume 38 (2000)

Vol. 38 No. 1 July 2000

N. Rylko: Transport properties of a rectangular array of highly conducting cylinders 1–12

D. M. Stump and G. H. M. Van der Heijden: Matched asymptotic expansions for bent and twisted rods: applications for cable and pipeline laying 13–31

V. Bubanja: The ac-dc difference of single-junction thermal converters 33–50

S. A. Morman and G. W. Young: An asymptotic approach to the mathematical modeling of Ohno continuous casting of cored rods 51–76

M. K. Wadee and A. P. Bassom: Restabilization in structures susceptible to localized buckling: an approximate method for the extended post-buckling regime 77–90

G. C. Hocking and L. K. Forbes: Withdrawal from a fluid of finite depth through a line sink, including surface-tension effects 91–100

Vol. 38 No. 2 August 2000

A. Andonowati and Daniel Chandra: The effects of spatial inhomogeneity in thermal conductivity on the formation of hot-spots 101–118

K. Sanjeev Rao: An Oseen-type model for swirling internal separated flows 119–140

Doo-Sung Lee: Nonlinear dynamic buckling of orthotropic cylindrical shells subjected to rapidly applied loads 141–154

Wensen Liu and Allen Plotkin: Application of Cosserat-spectrum theory to the weakly compressible Stokes flow past a sphere 155–172

Yu. A. Mitropolsky, A. A. Berezovsky and Yu. V. Zhernovyi: Mathematical modelling of heat transfer during electron-beam autocrucible melting by means of the steady-state Stefan problem 173–190

J. D. Evans, M. Vynnycky and S. Ferro: Oxidation-induced stresses in the isolation oxidaton of silicon 191–218

A. I. M. Denneman, R. J. J. Jongschaap and J. Mellema: Rheological behavior of a confined bead-spring cube consisting of equal Fraenkel springs 219–232

Vol. 38 No. 3 October 2000

R. V. N. Melnik and H. He: Modelling nonlocal processes in semiconductor devices with exponential difference schemes 233–263

P. Vainshtein, M. Shapiro and C. Gutfinger: Waves of high frequency in suspensions near the critical point of the particulate pressure-density dependence 265–278

A. B. Finlayson and J. H. Merkin: Creation of spatial structure by an electric field applied to an ionic cubic autocatalator system 279–296

J. Koko: Modeling of textile composites with warp/weft frictional contact 297–308

R. Smith: Optimal discharging in a branched estuary 309–322

J. O. Nygaard and J. Grue: Wavelet methods for the solution of wave-body problems 323–354

S. J. Cox and M. J. Cooker: Potential flow past a sphere touching a tangent plane 355–370

Vol. 38 No. 4 November 2000

G.W. Young and J.A. Heminger: A mathematical model of the edge-defined film-fed growth process 371–390

C.C. Chang and M.C. Shen: Nonlinear capillary-gravity waves under an edge condition 391–402

B.J. Geurts, R. van Buuren and H. Lu: Application of polynomial preconditioners to conservation laws 403–426

J. Adler: Diffusion-controlled smoulder propagation in a composite slab 427–438

The 2000 James Lighthill Memorial Paper

D.S. Jones: Singularites of Fourier transforms 439–470

Authors index 471

Contents of Volume 38 473–474
